Detail Introduction :

Product ingredients:

Nicotine	The key ingredient in Nicotine Packets For Mouth is nicotine, a central nervous system stimulating substance that provides what nicotine users demand.
Food-Grade Matrix	These nicotine pods typically contain a food-grade matrix to carry the nicotine and flavor. This matrix is usually biodegradable, ensuring the quality and taste of the product.
Flavor Additives	In order to provide diverse flavor options, Nicotine Packets For Mouth may contain various flavor additives, such as fruit, mint, chocolate, etc.

Product storage method:

Store Nicotine Packets For Mouth in a dry, dark and ventilated place, away from direct sunlight and high temperatures.

Products are usually supplied in sealed packages to ensure freshness if unopened.

Avoid exposing the product to moisture or liquids, which may affect quality and taste.

Product usage:

Using Nicotine Packets For Mouth is easy. Users simply remove a nicotine packet, place it in their mouth, usually between their upper or lower lips, and gently chew or suck on it.

Keep the nicotine pack in your mouth for a while until you feel satisfied or until the nicotine is released.

Dispose of used nicotine packets properly after use.

Product advantages and features:

SMOKING ALTERNATIVE: Nicotine Packets For Mouth are a smoking alternative that allow smokers to satisfy their nicotine needs while avoiding the combustion and smoke of traditional tobacco.

Flavor Variety: These products offer a wide variety of flavor options to suit a variety of taste preferences.

Customized nicotine intake: Users can customize nicotine intake according to their needs and get a personalized smoking experience.

Convenient to carry: Nicotine Packets For Mouth are small, lightweight and easy to carry, allowing users to satisfy their nicotine needs at any time.

Reduces Secondhand Smoke Exposure: Since there is no combustion and no smoke produced, these products reduce secondhand smoke exposure to others.

Anti-smoking aid: For people who want to quit smoking, these products can be used as a transitional product to gradually reduce nicotine intake, helping to reduce nicotine dependence.
